Article IX. PEN QUALIFICATIONS A PAG qualified pen consists of entirely hand made components made using manual machine tools. The only exceptions being the nib and the filler system. If a PAG member chooses to use other pre-manufactured parts the following rules apply: The existence of pre-manufactured parts must be cited in all media. No PAG logo or mention of PAG membership is to be used on any media where these non PAG qualified pens are advertised. Images of non PAG qualified pens on a member's website, social media or in print must not have any mention of PAG or use the PAG logo. PAG logo may be used on a separate website page with images of PAG qualified pens. Member's displays at trade shows or other venues must have a clear delineation between PAG qualified pens and pens with pre-manufactured parts. Both visual and physical delineation if the PAG logo is present on their table. Collaborations: A member collaborating with another artisan is acceptable as long as the contribution follows PAG guidelines and is properly cited. Collaborations can include but are not limited to engraving, scrimshaw, lacquer work, hand painting and other art forms. \*
